

## Improve Your Guest Room Experience with Hospitality-Grade TVs

Hospitality WiFi is a preferred vendor for major TV brands in hospitality. With preferred pricing on Samsung and LG TVs, we can help you upgrade existing guest room TVs to enable a better in-room entertainment experience.

We understand that guests today are looking for an entertainment experience that's more like home- but we also understand that your technology has to fit your budget and your existing infrastructure. That's why we offer a variety of options including Smart and non-Smart TVs and Prodiom and non-Prodiom versions.

Casting and streaming are becoming more requested by guests, and newer hotel-grade TVs offer features such as dedicated HDMI ports that enable these technologies; some newer TVs even include built-in Chromecast technology.

Offering options for casting and streaming can make your hotel stand out among your competitors, and replacing paid content providers with casting/streaming solutions can even lower operating costs. To help you add these options, Hospitality WiFi offers an easy-to-use, cost-competitive, Chrome-based casting solution that can be integrated into your existing PMS system. \*

\*additional fees may be required for integration

**If you're budgeting to replace your older guest room TVs or upgrade to include newer technology, call us - we can help.**
